

Hello I'm Sachin Kandel

Computer Engineering Student

Pokhara, Nepal | contact@Sachin0010.comnp | +977 9814216138

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Skills

- **Languages:** Python, Django, JavaScript, C, C++, AI, ML
- **Frontend:** HTML, CSS, Bootstrap
- **Databases:** MySQL, SQLite
- **Tools & Technologies:** Git, REST API
- **Soft Skills:** Teaching, Team Collaboration, Sports Content Creator

Education

Computer Engineering – School of Engineering, Pokhara University

2023 – Present (Expected Graduation: 2027)

High School (Science Stream) – Shree Gogan Secondary School, Pokhara

2019 – 2021

PROJECTS

EMS System – Event Management System

- Collaborating with senior developers to build an **EMS system** using Django backend.

Crop Recommender

- Django-based app **helping farmers make data-driven decisions** using localized soil and environmental data.
- Regularly updating content and improving the user experience.

SMS System –Student Management System

- Django-based **CRUD application** for managing student records (add, update, view, delete).

AI Tutor – AcademicTutor

- AI-powered academic tutor for **personalized learning and exam preparation.**

Celebrity Search Application (Langchain)

- LangChain-based application that retrieves and summarizes information about a searched celebrity using **LLM chains.**

AgroSense — IoT & Machine Learning Ecosystem for Agriculture

- Built an **end-to-end IoT + ML system** to improve agricultural decision-making and efficiency.
- Collected real-time soil and microclimate telemetry using **an ESP32** edge node.
- Streamed sensor data persistently to a cloud-hosted **MySQL database on Railway.**
- Trained Scikit-Learn pipelines to recommend optimal crops and fertilizer configurations.
- Integrated local LCD actuators for instantaneous **on-field feedback to farmers.**
